Riders 1676.

British Merlin:

Bedeckt with many delightful Varieties, and useful Verities, fitting the Longitude and Latitude of all Capacities, within the Islands of *Great Britains* Monarchy, and Chronological Observations of Principal Note, to this Year 1676, being Bissextile or Leap Year.

WITH

Notes of Husbandry,

Physick, Fairs, and Marts, Directions and Tables to all necessary Uses.

Made and Compiled for the benefit of his Countrey,

BY

Cardanus Riders.

LONDON:

Printed by *T. N.* for the Company of *Stationers.* 1676.

Profitable Observations and Notes.

ALl Measures of Longitude are deduced from Barley Corns: Three Barley Corns make an Inch, Twelve Inches one Foot, Three Feet one Yard, Five Yards and an half one Statute-Pole, or Perch; Forty Perches make a Furlong, Eight Furlongs make an English Mile, in a Mile are Three hundred and twenty Perches or Poles, One thousand fifty six Paces: Ells, One thousand four hundred and eight: Yards, One thousand seven hundred and sixty: Feet, Five thousand two hundred and eighty: Inches, Sixty three thousand three hundred and sixty; and Barley Corns, One hundred ninety thousand and eighty.

The Circumference of the Earth and Sea, joyntly is 25036 Miles, and the Diameter 7966 Miles, and its Semidiameter 3983 Miles, according to English Mensuration.

The Dimensions of England, and the Adjacent Islands.

THe length of *England* from South to North is 586 Miles, the broadest place from the Lands end to Sandwich, is 320 Miles; the next broadest place, which is between S. *Davids* and *Yarmouth* in the East, is 240 Miles; the whole compass of *England* is 1532 Miles.

The length of *Ireland*, North & South is 303 Miles, the greatest bredth therof, East & West, is 112 Miles, the whole compass of the main Land is 948 Miles.

The greatest length of *Scotland*, South and North, is 480 Miles, and the bredth, East and West, is 165 Miles, the whole compass 1100 Miles.

The Isle of *Man* is in length 28 Miles, the bredth 18 Miles, and in compass 91 Miles.

The Isle of *Anglesey* is in length 21 Miles, in bredth 18 Miles, in compass 85 Miles.

The Isle of *Wight* is in length 24 Miles, in bredth 14 Miles, in compass 60 Miles.

The Isle of *Garnsey* is in length 13 Miles, in bredth 9 Miles, the whole circumference is 36 Miles.

The Isle of *Jersey*, in length 10 Miles, in bredth 6 Miles in compass 28 Miles.

A Geographical Deſcription of the World,

containing Europe, Aſia, Africa, *and* America.

Europe contains in it theſe Provinces, Germany, Swedland, Denmark, Italy, Muſcovia, Hungaria, France, Spain, Polonia, Sclavonia, Norway, Grecia. The moſt eminent Iſlands are theſe, Great Britain, Ireland, Sardinia, Candia, Nigropont, and Corſica.

The greateſt length of this part of the World, is 3000 Miles, the bredth 900.

Aſia, the biggeſt of the Four, and firſt known part of the World, contains theſe principal Regions and Ilands, *viz.* Armenia, Anatolia, Perſia, Aſſyria, China, Syria, Arabia, Meſopotamia, India, Parthia, Media, Paleſtine, Caldea, Tartaria.

In *Africa* are theſe Provinces, *viz.* Egypt, Barbary, Æthiopia, Nubia, Abaſſines, Monomotopa, Lybia. The Iſlands Magdagarde, S. Thomas, Inſula de Cape Verde, Inſula de Canaria, Inſula de Madera.

America the Fourth Part of the World, and of the lateſt diſcovery, conſiſteth of theſe two Parts, Mexicana, and Peruana.

The Provinces of Mexicana, are Nova Hiſpania, Terra Florida, Nova Albonia, Calyornia, Norimbega, Nova Francia, Eſtoriland. The cheif Ilands of Mexicana, are Greenland, Heland, and Friesland.

The Provinces of Peruana, are Braſil, Piſnl le Chibana, Peru de Cartanen, Chila, Charon, Chico, Patagores. The cheif Ilands of Peruana, are Hiſpaniola, Cuba, Jamaica, and many others.

100	0	10	0	1	10	0	3	0	0	4	10	0	6	0	0

THe use of this Table is this. If thou wouldst know what the Interest of 100, and 5 pound is, for 9 Moneths, at Six *per Cent.* then in the first Column find out 100 at the Foot of the Column, and right against it under the title 9 Moneths (which is the fifth Column) here you shall find 4 *l.* 10 *s.* And against the number 5 *l.* you shall find 4 *s.* 6 *d.* So that the Interest of 105 *l.* for 9 Moneths, cometh to 4 *l.* 14 *s.* 6 *d.* The same of all the rest.

A Computation of the most remarkable Pas-
sages of the Times, from the Creation to this pre-
sent Year 1676.

The Creation of the World according to Chronology.	5625
The Creation according to verity.	0000
Noahs Flood.	3669

This is the Season for good Husbands to lop and prune superfluous Branches from Fruit-trees: Uncover their Roots; set all kind of Quickſets and Fruit-trees in the New of the Moon. Be ſure the Wind be not North, nor East; and ſet the ſame ſides to the South and Weſt, which grew at the firſt. Set Beans, Peaſe, and Parſnips: The Weather mild, and Moon decreaſing, dig Gardens: Drench weak and ſick Cattle, Kine, with Verjuice; Horſes with Water and Ground Malt, ſodden with a little Bran.

In this Moneth let not Blood, nor uſe Phyſick, unleſs neceſſity conſtrain thee; beware of taking cold, for Rhumes and Fluxes do much increaſe this Moneth: Its hurtful to faſt long, to drink White Wine faſting is good. Uſe Meats that are moderately hot, for the beſt Phyſick is warm diet, warm cloaths, good fires, and a merry honeſt Wife.

February hath xxix days.

This Moneth ſet, cut, and lay Quickſets and Roſes, as all other Plants. Set and Plant Vines, Hops, and all fruit that grows on Buſhes. Sow Peaſe, Beans, and Onions; furniſh your Gardens with Sallads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Canker, and ſuperfluous Branches. Remove Grafts or young Trees, in the laſt quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge, you may let Blood, but be ſparing in Phyſick, and be ſure when a warm day comes, to prevent taking of cold, through careleſneſs; for the warm Air this Moneth is not laſting, but oft deceives us to our prejudice.

In this Moneth, Slimy Fiſh, Milk, and the like, that do opſtare, and ſtop the Liver, and the Veins, and thicken the Blood, are to be eſchued as Enemies to Health.

Now regarding the Wind and Weather, Graft, cut Quickſets, cover the Roots of Fruit-trees (opened in *December* and *January*) with fat Earth; ſow Oats, Barley, Parſnips, Onions, Carrots, Melons, Cowcumbers, and all kind of Pot-Herbs, ſlip Hartichoaks and Sage, and ſow all manner of Garden Seeds.

Now adviſe with the honeſt and able Aſtrological Phyſitian; it is good to purge and let Blood, for in this Month the Humors and Blood increaſe, and groſs Feeding breedeth groſs Blood and Humors; therefore uſe Meats of good digeſtion, and ſuch as afford good Juice and Nutriment to the Body; forbear all things ſalt, purge the Blood by Potions, and Blood-letting: Sweet Meats and Drink are commendable. Be ſure to eat in the morning before you drink.

April hath xxx days.

This Moneth sow Hemp, and Flax, Pole Hops, set and sow all kinds of Garden Herbs. Restore the liberty of the laborious Bee, by opening her Hive. Bark Trees for Tanners; and let good Huswives mind their Gardens, and begin to think of their Dairies.

In Gardning never this rule forget,
To sow dry, and set wet.

The use of Physick becomes now seasonable; as also Purging and Blood-letting. It is good to obstain from Wine; for many Diseases will be taken thereby, to the ruine of many.

This Moneth the Pores of the Body are open, and apt to receive Physick; therefore this is the best time to remove, and prevent causes of sickness, or for speedy remedy in extremities. Pray to God for a blessing.

This Moneth commands the provident Houſwife, and the prudent Artiſt, to ſet their Stills on work. In the beginning of the Moneth ſow and ſet thoſe tender Summer Herbs that would not endure the former cold. Weed your Hop Gardens, cut off ſuperfluous Branches. Moſs Trees and Gardens, and weed Corn; riſe early, and walk the Fields and Gardens.

Now every Garden, and Hedge affords thee Food and Phyſick. Riſe early, walk the Fields by running ſtreams, the North and Weſt ſides. Sage and Sweeter-Butter, an excellent breakfaſt. Clarified Whay with Sage. Scurvy-Graſs, Ale, and Worm-wood Beer, are wholſome Drinks. Green Whay excellent againſt Choler. Eat and drink betimes in the morning. Abſtain from Meats that are hot in Nature, and ſalt in Quality.

At the Full of the Moon, this Moneth and next, gather your Herbs to keep dry for the whole year. Set Rosemary and Gilliflowers, sow Lettice and Radish, three or four days after the Full, and they will not run to Seed. Shear your Sheep, the Moon increasing. Take heed of cutting Herbs or Flowers with Knife, but rather gather them with your Fingers.

Let honest moderate Labor and Exercise, procure your Sweat. Use thin and light Diet, and chaste Thoughts, tend to health. Lie not unadvisedly on the Ground, or overhastily drink.

Distilling of Roses, and making of Syrrups and Conserves are now in prime: Use a light and thin Diet, for the Stomach is weaker now then in the former Moneths; Clarified Whay boiled with cold Herbs, very wholsome.

Get Rue, Wormwood, and Gall, to ſtrew on your Floors, to deſtroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the ſhade, then in the Sun, which too much exhaleth their vertue; but to avoid corruption, let the Suns heat a little viſit them.

Beware of violent heat, and ſudden cold, which are the great diſtempers of this Moneth, and produce peſtilential diſeaſes: Forbear ſuperfluous drinking, but eat heartily; uſe cold herbs and meats, abſtain from Phyſick. Now the Rivers are more wholſome then the Baths. In time of Peſtilence keep your Chamber windows ſhut till the Sun have force of ſhining. Perfume your Chamber every morning with Tar, upon a Chafing-diſh of coals: Uſe *Carduus Benedictus* boiled, and drank faſting.

Now with thankfulness reap your desired Harvest. Sow Winter Herbs in the New of the Moon. Esteem fair weather as precious, and mispend it not. Gather Garden Seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Blood-letting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof. Now moderate Diet is best, beware of Surfeits, Heats, and Colds, for Plurisies are ingendred thereby. Use not to sleep much, especially in the afternoon, for that brings opilations, headach, Agues, and Cathars; and all noxious distempers of the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

September hath xxx days.

The beginning of this Moneth, and the end of the former, gather Hops, their Complexion being brown, and the weather fair, and no dew on the ground. Kill Bees, make Verjuice, remove and ſet all ſlips of Flowers, between the two Lady days; remove Trees from *September* till *February*, eſpecially in the new of the Moon. The weather warm, and the Wind South or Weſt, cut Quickſets, gather ripe Fruit, ſow Wheat and Rie, Winter Parſnips and Carrots; and ſet Roſes, Strawberries, and Barberries.

Now as the year declines, provide your Winter Garments, hang them on looſly, to prevent that you might after repent of: Good for Phyſick and Phlebotomy.

Sow Wheat and Rie, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and West which were so before you took up the Plant; otherwise the cold kills it. Gather your remaining Winter Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two years, if you intend to have store of Roses.

The Garments you last Moneth hung on your backs in jest, now Button them close in good earnest: Cloath you now for prevention, for the Cold comes insensibly, and Fogs oftimes beget a whole Winters cold. Consult with your Tailors, as well as Physitians.

Set Crabtree Stocks to graft on. In the old of the Moon, let Peafe and Beans, and ſow Parſnips and Carrots, Trench Gardens with Dung, uncover the Roots of your Apple-trees, and ſo let them remain till *March*. Kill Swine in or near the Full of the Moon, and the fleſh will the better prove in boiling.

The beſt Phyſick this Moneth, is good exerciſe, warmth, and wholſome Meat and Drink: But if any diſtemper afflict the body, finiſh your Phyſick this Moneth, and ſo reſt till *March*, unleſs neceſſity urge. Uſe good Meat and wholſome Drinks to nouriſh the Blood. Be ſure to go dry of your feet; for if you go wet of your feet (unleſs it be thoſe always uſed to it) be certain to be troubled with Rheume and Cold, and other inconveniencies attending.

In the laſt Quarter of the Moon, this Moneth and the next, are the beſt times to fell Timber: Let Fowlers mind their Game. Cover all your beſt Flowers and Herbs from cold and ſtorms, with rotten Horſ-dung. Look well to thy Cattle, Blood Horſes. Let a warm fire, and a cup of *Nectar* be thy Bath; the Kitchin thy Apothecaries Shop, hot Meats and Broths thy Phyſick, and a well ſpred Table the proof of thy Charity to thy poor Neighbors, to whom this advice is ſeaſonable:

If thou be poor, and canſt not feaſt at all,
Think God for ſuch as thee to feaſting call.

The beſt Phyſick is as before, a merry honeſt heart, and the exerciſe of Charity among thy poor Neighbors. The next year I will commend thoſe that keep good Houſes this year.

Of Eclipses this present Year, 1676.

THere will be two *Eclipses* this year of the Su
none of the Moon.

The first will be on the first of *June*, abo
a quarter of an hour after nine of the clock in t
Forenoon. It will be but a small Eclipse to us, sca
a third part of the Suns body will be darkned; t
darkness will be on the North part of the Suns bo
This will be a total Eclipse in the North parts of t
World; this doth threaten many people and pla
with the *Small Pox* and *Measels*.

The second Eclipse of the Sun will be the twen
fifth day of *November*, three quarters past seven
the Morn: Hardly any part visible to us, but in th
South East parts of the World it will be very consp
cuous.

Note the Planet *Venus* is our glorious Evening Sta
from the beginning of the year to the Twenty nine
of *August*: after which time, she is the Bright Morn
ing Star to the years end, rising before the Sun.

Of the FOUR Quarters of this present Year, 167

THe Spring Quarter begins this year the Nineth
March, at four in the Afternoon, making the D
as long as the Night, all the World over, except wit
in the *Polar Circles*.

The Summer Quarter takes beginning the Tent
day of *June*, a Quarter before seven at Night, makin
the longest Day and shortest Night in the year, to a
who inhabit on this side the *Equator*.

The Autumn Quarter begins the Sun entring thi
Equator Libra, *Sept.* 12. near three Quarters pa
nine in the Forenoon, making now the Night as lon
as the Day again.

The Winter Quarter enters *December* the Tenth da
the Sun then entring the Southern *Tropick Capricorn*
at ten a Clock at Night; making the shortest Day
the Year, to all, North of the *Equator*: and th
longest Day in the Year to them, who inhabit beyon
the Line of the *Equator*.

rue and plain deicription of the High-ways in *England* and *Wales*.
